# 5,000L FITTING DIAGRAM MID

FRONT OF TANK

Each tank comes with 1 x 90mm overflow kit, 1 x 1" outlet and 1" ball valve.

Extra overflow kits, outlets and ball valves are available if required. Different size outlets and ball valves are also available.

- Overflow(s) can be drilled at anyone of the four points around the circumference of the tank at 12, 3, 6 or 9. (Your Plumber may prefer to drill the overflows on site. Please advise if that is the case)
- Outlet(s) are already moulded into the front of the tank at 12 but are not drilled all the way through. (Your Plumber may prefer to drill and fit the outlets on site. Please advise if that is the case)
